Base DoD
Acceptance criteria met
Code reviewed, module boundaries respected
Automated tests incl. failure cases
Tenant isolation and authorization tested
Validation and error handling
Migrations reviewed and repeatable
Safe correlation fields in telemetry, redaction
Docs and contracts updated
No unaccepted critical or high defects
Rollback or feature flag understood
Product Owner can inspect behavior
AI add-on
Model and prompt version identifiable
Tool schemas validated, permissions in code
Retrieval tenant scoped
Empty retrieval and uncertainty paths tested
Regression example added
No secrets or hidden reasoning in logs
Voice add-on
Mic permission and active state clear
Cleanup on disconnect
Interruption tested
Transcript finalization and ordering tested
Audio and transcript retention per policy
Latency and failure metrics emitted
if AI-related
if voice-related
