7 Cross-cutting
security, audit,
observability, evaluation,
usage
1 Edge and channel
adapters
widget, webhooks, voice
transport, email/messaging
2 Application API
authN, tenant resolution,
validation, rate limiting
3 Conversation domain
sessions, messages,
turns, lifecycle
4 AI orchestration
model routing, policy,
retrieval, tool planning,
response
5 Capability modules
knowledge, tools,
workflow, tickets, human
inbox
6 Infrastructure adapters
SQL, object storage,
vector index, queue, LLM,
speech
